** 65 Awards

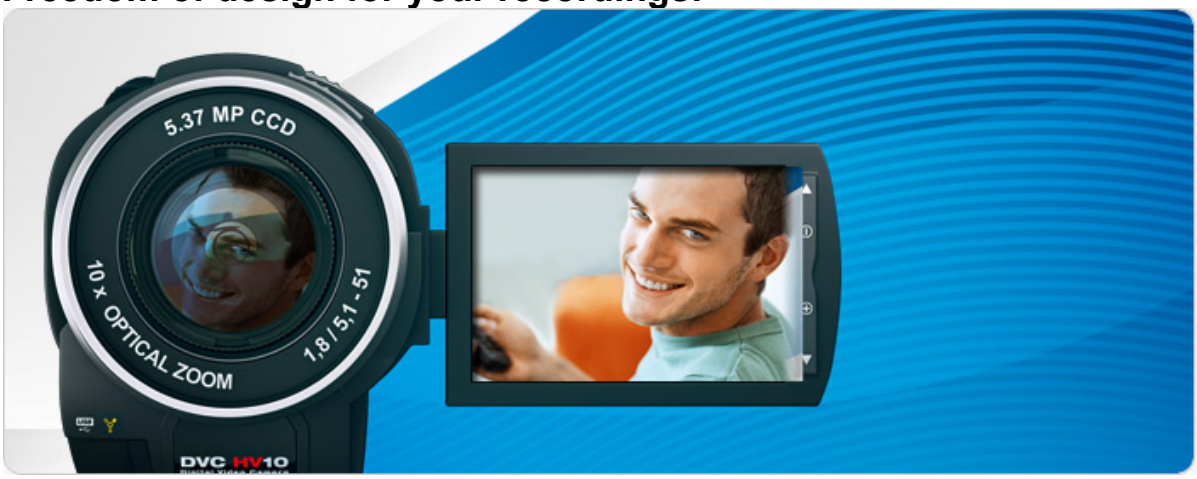
** **65 awards** refers to the following versions of MAGIX Movie Edit Pro (Classic & PLUS versions): 6, 7, 8, 9, 10, 11, 12. Award wins from other countries refer to the country-specific version. More information at www.magix.com.

Only in the PLUS version

Individually adjust effects, music, and transitions

You are in the director's chair! If you don't want your recordings to be edited automatically, you can adjust all special effects, fades, and music any way you see fit. With various ways to change the settings and professional control elements, your PC can turn into a complete video studio in a flash.

Freedom of design for your recordings!



Experience the new standard for perfect video editing: MAGIX Movie Edit Pro 14 PLUS.
The 65-time award winner** convinces not only with its high-quality edit functions and a excellent dubbing, but also with countless special effects and many new improvements that will excite you!

NEW!

- **Direct YouTube upload**
- **Screen capturing feature**
- **Support for NextGen consoles**
- **3D real-time animation with iClone 2 SE**
- **Optimized scene recognition**
- **Online media integration (photos, music, texts)**
- **Batch processing for groups of files**
- **DVD projects as high-resolution PC shows**

Present with perfection:
on TV, on the move & online!

- Burn to CD/DVD with an animated menu and experience on TV using a DVD player.
- Transfer to mobile video player in top quality and the right format.
- Transfer videos and slideshows to digital frames with sound.
- Present as a HD show with menus in your free MAGIX Online Album or upload to YouTube™ as a web-optimized video.

NEW! Surround authoring: Create Dolby® Digital sound yourself

With the integrated Dolby Digital 5.1 Creator (fee-based plug-in purchase required) you can put your videos into a new sound dimension. You can assign sound effects to characters in space or let sounds fly through the room from one loudspeaker to the other. Just like at the movies! With Dolby® Digital 5.1 Creator the sound in your movies will be just as captivating as the video!

Import, edit, burn & present HD videos

MAGIX Movie Edit Pro 14 PLUS is the optimal solution if you want to easily edit HD videos: all common HD video formats can be imported, optimized, and dubbed in no time at all, burned as a HD DVD disc, and presented on TV or online! Razor sharp, professional results guaranteed!

NEW! 3D real-time animation with iClone2 SE

The ideal complement for MAGIX Movie Edit Pro 14 PLUS: With advanced character design and amazingly convincing real-time video effects you can add speaking characters, 3D scenes and cinematic special effects. Turn photos into unbelievably real persons! Even complex movement sequences and choreographed scenes can be easily realized using iClone 2.0 SE.

NEW! Top templates for picture-in-picture animations

Create excitement! The professional templates for picture-ion-picture animations make for impressive special effects in each video. Simply drag selected videos into the additional video tracks, determine the sequence and enjoy the show! While the main video is playing in the background, the additional video will be faded in over it –
just like its is done on TV during live broadcasts or interviews.

NEW! Record directly from computer screen with screen capturing technology

Would you like to be able to capture videos that you see on your monitor? MAGIX Movie Edit Pro 14 can do this easily! The smart screen capturing technology lets you record Internet videos during playback and use them in your projects after saving as a file.

NEW! Optimized scene recognition

Do you have video recordings that are not separated into individual scenes? With the new, improved scene recognition it's easy to do this retroactively, too. MAGIX Movie Edit Pro 14 PLUS scans the time code and recognizes pauses in the recording, marking these automatically as individual scenes to help you comfortably navigate through your video recordings.

NEW! DVD projects as high resolution PC shows

Would you like to play back your DVD project on the PC without having to start Movie Edit Pro or having to burn an extra DVD? Simply export your project as a high-resolution PC show, which can be playback any time – as a regular video. This way you can present intermediate results of your work to your audience!

NEW! Online media integration

Useful: You can now integrate downloaded videos, photos and music from the Internet into your video project. For example, integrate ad spots or movie trailers into your project. The comprehensive support for all common media formats lets your creativity know no bounds.

NEW! Batch processing of many files at once

Do you want to process multiple video files into another format in one go? No problem! Mark as many files in a folder as you want with the comfortable batch processing feature and start conversion. The selected videos will be converted into the desired format completely automatically one after the other. This way, you'll have more time left for watching!

NEW! Put videos directly on YouTube™

Would you like to present your videos online? Export your clips directly from Movie Edit Pro 14 to YouTube™ and become an active member in the biggest video community in the world. It's easy – just a few mouse clicks and you are done. Your video is online and can be viewed around the whole world!

NEW! Support for NextGen games consoles

With MAGIX Movie Edit Pro 14 PLUS you can turn your games console into a digital video player: simply export your videos in a format supported by your console and enjoy your videos in the highest quality on your TV!

Online extras

Catooh – the Online Content Library

You'll find everything you need right here! A giant download archive of high-quality media offers everything you could ever desire – including useful preview function for all files. Enrich your media projects with arty DVD menus, moody background music, exclusive sounds, photos, videos, and much more.

NEW! Sell your media on Catooh: Simply register, upload media, and earn money!

NEW! Live user chat & knowledge portal

Integrated live user chat offers you the possibility to exchange with other users immediately and without time delay. Just launch the communicator, enter your question, and wait for the answer online.

If that doesn't help, then take a look at the new online knowledge portal: Lots of topics, even more info, even more knowledge!

MAGIX .info
Multimedia Knowledge Community
